FD OPTIMIZATION SERVICES

When things are not going according to plan, everyone wants their questions answered – right now. Is information reliable? What can be done to optimize cash flow? Can management handle the situation? Getting to the right answers, right now, requires experience, fortitude, and insight.

FD Optimization offers a full range of interim management and consulting services to address key issues in distressed, turnaround and other special situations. All of these services are focused on enhancing quality of leadership, information, cash availability, cost structure optimization, and facilitating high quality communication with relevant constituencies.

In time of critical turnaround and restructuring situations, FD Optimization can field a team of experienced leadership, financial management, accounting, and tax professionals to quickly assess the situation, gain control of critical assets, systems and relationships, and develop and implement a plan to optimize value for stakeholders.
